### PORTFOLIO

Personal portfolio showcasing the freelance apps, games, and digital products I've designed and developed.

### EXPERIENCE

#### Senior Software Engineer & Product Manager

MundiMoto Group 2022 - Now

Played a key role in building and scaling Mundimoto's website and sales-related technology products, contributing from initial concept to launch. Key responsibilities & achievements:

Led product development from conception to execution, balancing technical delivery with business needs.

Managed stakeholders across sales, operations, and leadership to align product goals with company strategy.

Designed and implemented new features to improve customer acquisition and sales processes.

#### Software Engineer

Accedo 2021 - 2022

Contributed to the development of VOD and live streaming applications for major UK broadcasters and media companies. Key responsibilities & achievements:

Developed new features for multi-platform streaming apps (Smart TVs, mobile, and web).

Ensured seamless video playback and reliable live streaming experiences.

#### Software Engineer

G-Stocks Global Investments. 2018 - 2021

Contributed to the development of solutions for stock valuation and investment recommendation. Key responsibilities:

Built and maintained a React-based web application.

Developed and optimized backend services using PHP & Symfony.

Led the development and project management of an iOS app.

#### Freelance Software Engineer

Freelance. 2016 - Now

Freelance developer specializing in building interactive apps and games with modern frameworks. Delivered end-to-end solutions for clients, from concept and design to deployment, with a focus on usability, performance, and engaging user experiences.

Selected Projects:

**Lime Launcher** - Clean and efficient Android launcher focused on privacy and seamless UX. Trusted by more than 100,000 users worldwide.

**Spellbook** - D&D 5e companion web app to browse spells and build characters. Used by more than 10,000 players.

**Rush Hour** - Web-based puzzle game where players use strategy and logic to escape a congested grid. Playable online.
